A similar effect has been produced by the bombardment of the Bulgarian Ægean coast by the Allied fleet, for, classifier the Bulgarian official bulletins, considerable damage was inflicted. At Porto Lagos the ships directed a rapid fire on a large military encampment, which in a few minutes resulted in spite of a renewal of the battle with furious energy in the impediate twicinity to the north and south. Bulgarians have suspended operations to reorganize their forces, while in-creasing arrivals of allied troops daily are stiffening the Serbian resistance. I am informed on good authority that the Greek staff are beginning to that the Greek staff are beginning to see that the German invasion of Serbia was more or less a piece of bluff to entice Bulgaria into the war. Instead of 800,000 men, announced by the Ger-man party here, barely one-fourth of that force has been detailed for the Serbian campaign. This gradual en-lightenment, even if tardy, will prob-ably have an important influence on the situation here.

ITALIANS THREATEN **GORIZIA AND TOLMINO**

(By Cable to The Tribane I

Turin, Oct. 25 (dispatch to "The Chronicle," London).—The offensive aperations, begun three days ago along 475 miles of the Italian front, rage more furiously than ever. General Cadoran's force is engaging 800,000 Austrians, of whom some 25,000 are reported to have fallen on the Isonzo and the Carso since the pitched battle began.

In these two sectors, following sixty hours of fierce bombardment of the enemy's positions, the total haul of prisoners exceeds 100 officers and 5,000 men. The Italian left wing is advancing up an inclined plane of rugged ground, a huge sponge with a fortress in every pore. It already has swept forward east of Petcano toward the northern margin of the Gorizian Carso, where the plateau shelves into the very heart of Gorizia. Thence the Austrian bridgehead beyond the Isonzo, formed by Mounts Sabotino, Podgora and Peuma, will be exposed to the Italian bombardment.

Intense satisfaction is felt at the

west. Although, owing to the vast masses of infantry employed, the chief masses of infantry employed, the chief interest naturally centres in the more eastern sections, yet the progress on the Alpine front is very remarkable. The last Austrian has been driven from the Col di Lana, a mountain 8,000 feet high, thus opening the way for infantry advance in the Parola Valley.
